

**For Immediate Release: September 2017**

Sun Global Broadband LLC has announced completion of Phase I of its super long-range Wi-fi network. Phase 1 includes outdoor network coverage from Diamond Head – Waikiki – Ala Moana – Ward Villages and is the first of several phases for island-wide coverage in Metropolitan Honolulu.

Sun Global Broadband's unique network design provides minimal signal delays, high-availability for superior quality HD videos, efficient voice over Wi-Fi, and high-persistence connections for Smart City Applications. Utilizing patented technologies from Altai Technologies, Casa Systems, Cisco Systems, and Enwa EyeVision, SGB innovation provides unique "hand-off" capabilities and continuous HD video capabilities not usually associated with Wi-Fi. SGB has agreements to aggregate indoor Wi-Fi with major venues/businesses enabling expansion for island-wide and statewide coverage.

SGB and its Asian/US partners designed this network for multi-country, single sign-on capabilities for the international visitor industry. Specialized software, supporting multiple languages over a private network, will provide travel and location based applications for cultural exchange between international travelers, Hawaii businesses, the Hawaiian community, Asia, and North American networks.

SGB is founded by technical entrepreneur and CEO/Chair Edward BT Sun. He was a former executive with GTE, Hewlett-Packard, General Electric, Aquasearch Corp., Advanced Technology Systems, Computer City, FiberDuct Solutions, Optimus Corporation and VeriFone Inc. SGB's Management team includes Brook Emanuel (CFO / COO), Sharon Sun (Secretary & Treasurer), Keith Lee (General Counsel), Wayne Hiras (Infrastructure Networks) & Frank Godek (Network Design).

Technology Strategist Rick Ellinger (Former CEO of Madge Networks & Manager of HP Labs), Marketing Strategist George Chalekian (former CIO for Milici Valenti, McCann Erickson, OgilvyOne & Mather), and, Travel Industry Strategist Millie Takesue (former Hawaii VP/GM for All Nippon Airways) round out the team.

SGB's prominent international board includes Dr. Sachio Semmoto (co-founder of KDDI Japan, eAccess, eMobile, Softbank Board member and Chairman of Renova); Dr. Fujio Matsuda (former University of Hawaii President, Exec. Director - Research Corp for the University of Hawaii, and former Hawaii Transportation Director); Mr. John Warta (Founder of GST Comm, Electric Lightwave, NextNet., Pac. LightNet, & Cascade Divide), and; Mr. James Clark (Hawaii Angels - International Investor). Advisors include Mr. Robin Campaniano (First Hawaiian Bank Board & Former CEO for AIG Hawaii), Thomas Yamachika (Hawaii Tax Foundation) and Dr. Raymond Leung (Former Chairman of TDK China, Founder of Amprex Technology Limited, Founder and Chairman of Altai Technologies Ltd).

SGB is located at the Manoa Innovation Center and appreciates support from the Hawaii Technology Development Corporation.
